Theme 16 Life in the Universe and Future

Test 1

Name: _____ Class: _____ Date: _____

Choose the best answer for each question.

1. By Friday, the crew ____ the safety checks.
   A) will completing B) will have completed C) have complete
2. By next July, she ____ on the project for two years.
   A) will be work B) will have been working C) will working
3. They will have returned before the conference, ____ they?
   A) haven't B) don't C) won't
4. The experiment won't have finished by noon, ____ it?
   A) will B) has C) does
5. By the time the supply vehicle arrives, the crew ____ all the storage areas.
   A) prepared yesterday B) will have prepared C) have preparing
6. The phrase 'will have been studying for six months' emphasises ____.
   A) a single completed event yesterday
   B) a present prohibition
   C) duration up to a future point
7. A space station provides a place for astronauts to ____.
   A) drive between nearby towns B) live and work in orbit C) observe only the ocean floor
8. The mission's supplies include the materials it ____.
   A) needs for its work and survival
   B) has already thrown away
   C) is forbidden to use under any conditions
9. 'Will the tests be finished before launch?' '____'
   A) Yes, the team finished tomorrow.
   B) Yes, the tests cannot ever begin.
   C) Yes, the team will have completed them by then.
10. By ten tomorrow, we ____ the first set of data.
    A) will receiving B) receive yesterday C) will have received

    A) have written B) had wrote C) be wrote

15. Which question asks about completion before a future deadline?
    A) Will you have checked the equipment by Monday?
    B) Did you check the equipment last Monday?
    C) Are you checking the equipment now?

Read the text and answer questions 16 to 20.

Before the Simulated Mission

A school science team is preparing for a three-day simulated space mission. By the start of the exercise, members will have tested their communication system and organised their supplies. Two students will have been practising the data-reporting routine for a month. The team expects some difficulties, so it has prepared backup procedures. After the exercise, members will compare what actually happened with their predictions. Their teacher explains that the goal is not to pretend the plan will be perfect, but to learn how preparation, clear roles and evidence can improve a future attempt.

16. What will the team have done before the exercise starts?
    A) Tested communication and organised supplies
    B) Completed a real journey to another planet
    C) Published the results of the exercise

17. How long will two students have practised the reporting routine?
    A) Three days B) A year C) A month

18. Why are backup procedures included?
    A) The team expects possible difficulties.
    B) The main plan has no purpose.
    C) The exercise has already finished.

19. What will members compare afterwards?
    A) Only the colours of their equipment
    B) Their school marks from primary school
    C) Actual events and their predictions

20. What is the educational goal?
    A) To prove that preparation removes every uncertainty
    B) To learn how to improve a future attempt
    C) To avoid reviewing any unexpected result
